About the Biodynamic Education Centre

The Biodynamic Education Centre was established in 1992 to provide farmers and gardeners throughout the world with the knowledge and skills for biodynamic farming and gardening.

Courses offered by the Biodynamic Education Centre have been written and developed over many years of practical experience in the biodynamic method for both large scale agricultural systems and smaller scale gardening systems.

Courses provided by the Biodynamic Education Centre include the Introductory Workshop, the Foundation Course and the Distance Education Certificate Program.

Distance Education Certificate Program for

BIODYNAMIC Farming and Gardening

When you hear something, you forget it. When you see something, you remember it. But not until you do something will you understand it.

Certificate Program for Biodynamic Farming and Gardening

Aim of study course

The aim of this course is to provide you with the knowledge, skills, experience and confidence to initiate, plan, develop, maintain and monitor a biodynamic enterprise.

About the course

The Distance Education Certificate Program is a comprehensive two year study program that will enable you to gain an extensive range of skills and knowledge for biodynamic practice and fully implement the biodynamic method in your individual situation.

Upon completion of the Certificate Program you be able to use your knowledge and skills in a variety of situations, such as a biodynamic practitioner or consultant and advisor to biodynamic practice.

Course format

This course has been developed to fit your needs. You can set the pace at which you study – for instance, spending more time on those things that challenge you and less on any skills and knowledge that you have already developed.

Course participation

This study course is suitable to people of all ages wishing to develop their knowledge and skills for biodynamic practice.

Time required

You will need to commit approximately five hours per week to study in conjunction with practical tasks.

What you receive

- Comprehensive set of course workbooks and reference material.
- Biodynamic Education Centre Course Manuals for Levels 1, 2 & 3.
- Assessment portfolio.
- Student support services.

Student support

- Tutors throughout participation on this program.
- On-line forum to network with other students.

Course fee

The cost of the two year study course, which includes all course materials, is \$AU5,500* (GST inclusive)

**Students who already have the Biodynamic Education Centre Course Manuals Levels 1, 2 & 3 pay \$AU5,400*

Payment option

Time payment option available on request.

This course will enable you to:

- Develop awareness, knowledge and confidence in biodynamic practice.
- Produce food of the highest nutritional value.
- Develop a deeper insight into the spiritual forces of nature.
- Enhance the etheric life of a site.
- Work in harmony with the rhythms in nature.
- Create healthy sustainable systems in balance with their environment.
- Support nature's capacity to regenerate and heal life in nature.
- Become a capable role model for biodynamic practice within your area of expertise.
- Learn in your own environment.
